Re: New ANAB Accreditation Program for ISO 28000 for Supply Chain Security Management Systems

This is announcement that ANAB is now ready to offer assessment and accreditation of certification bodies (CBs) to offer and provide accredited certification for supply chain management systems conforming to ISO 28000:2007.

ANAB's accreditation program requirements for SCSMS are detailed in ANAB Accreditation Rule 24.

CBs may purchase the application form through EQM.

CBs are required to conform to ISO/IEC 17021:2006 and to ISO 28003:2007. As ISO 28003 is based very much on requirements of ISO/IEC 17021, ANAB has developed a matrix comparing all of the clauses of these two standards. This matrix, which is for informational use only, can be accessed through EQM, via the reference documents, documents/forms tree view item, ISO 28000 (SCSMS) Informational Comparison.
